EXPERIENCE

Android Developer Intern

Prodigy Infotech

July 2024 – July 2024

Mumbai

- Successfully completed a hands-on internship in Android Development, where I designed, developed, and deployed multiple fully-functional applications using Android Studio and Kotlin.
- Built and deployed the following apps as part of the internship tasks:
 - Tic Tac Toe Game App:** Developed a 2-player game with turn-based logic, win/draw detection, and an interactive grid layout.
 - Stopwatch App:** Created a stopwatch with Start, Pause, Resume, and Reset functions using Handler and Runnable classes.
 - Calculator App:** Implemented a basic calculator with support for arithmetic operations and real-time result updates.
 - To-Do List App:** Designed a task management app with RecyclerView and SQLite for storing tasks locally.
 - QR Scanner App:** Integrated ZXing library to scan and decode QR codes in real-time.
- Gained experience in working with Android components like Activities, Intents, Layouts, Listeners, and Firebase.
- Technologies used: Kotlin, XML, Firebase, ZXing, Razorpay, Android Studio.

PROJECTS

Online Coffee Shop App (CafeD)

Personal Project

2025

Android

- Developed an online coffee ordering app with product categories, user login, cart, favorites, and order history.
- Used Firebase Realtime Database for data storage, Firebase Auth for user management, and Razorpay for payments.
- Implemented fragments for cart, profile, order history, and favorites; used separate activities for categories.
- Technologies: Kotlin, XML, Firebase, Razorpay SDK, Glide, Android Studio.

Recipe App

Personal Project

2024

Android

- Built a subscription-based recipe app where users can access veg recipes after choosing a payment method and subscribing.
- Integrated Razorpay to handle UPI, cards, and wallet payments; users can only view content after successful payment.
- Created a recipe app with Firebase integration to fetch dynamic recipe content and display it cleanly using RecyclerView.
