- Frontend language:- HTML5, CSS3
- Backend & Database:- Firebase, SQL(Structured Query Language), MongoDB, SQLite
- Tools & Platforms:- Android Studio, Visual Studio Code

PROJECTS

- Online Coffee Shop Application**

Overview

Developing an online coffee shop app that enables user to browse and order coffee seamlessly, with a focus on an intuitive UI.

Tech Stack:

- Kotlin, XML, Firebase, Razorpay.

Features:

- Menu Browsing: View a variety of coffee options with detailed description.
- Cart & Checkout: Add items to cart and complete order smoothly.
- Payment Integration: Secure and online payment via UPI, Cards or wallets.

• Online Recipe Application

Overview

Developed a food recipe android application with user-friendly interface, featuring a curated collection of vegetarian and non-vegetarian recipe, step-by-step instructions, and ingredients details.

Tech Stack

- Kotlin, XML, Firebase, SQLite, Razorpay.

Features

- Step-by-Step instructions: Easy to follow cooking steps with images.
- Search & filters: Find recipes based on titles.
- Favourite & Save: Bookmark favourite recipe for quick access.

CERTIFICATION

• Android Development Internship (Prodigy Infotech)

Certificate of Completion

Recognition for successfully completing the internship.

• Python

Certified by HackerRank

• Python

Certified by Infosys

• Python

Certified by DataFlair

• Cascading Style Sheets (CSS)

Certified by HackerRank

• Artificial Intelligence Fundamentals

Certified by Great Learning

INTERESTS

- Music
- Traveling
- Problem Solving
